I am writing this letter on behalf of Sherri, owner operator at elite dog detection. I have used Elite detection on a number of my bed bug treatments in the past and highly recommend their services. Sherri, in particular shows her caring, passion, and professionalism consistently.

A typical bed bug dog inspection consists with 3 dogs being brought into the areas where bed bugs are known to be. Sherri is constantly training her dogs and she really cares for her clients by bringing the dogs through one at a time for maximum efficiency.

Working with Elite dog detection services has enabled me to feel as if I now have a true partner in my pest control endeavours.

Joe Bruno
